

WHAT IS IT?

Hy-Per Lube High Performance Oil Supplement originally earned its reputation for superior lubrication in industrial, commercial and high performance applications. It continues to be used when extreme pressure, high temperatures, high wear and agitation are normal and more severe than general automotive lubricating requirements. Today it is also used in all vehicle applications due to demanding everyday driving conditions and today's driver expectations of high performance and longer engine life.

Hy-Per Lube is proud to make the following promises:

- Increased fuel efficiency
- Increased horsepower and torque
- Cooler lubricating temperatures for hot weather, towing, racing and under heavy load conditions.

Plus:

- Reduced oil consumption
- Frees sticky valve lifters
- Improved oil pressure
- Maximized or restored compression
- Significantly longer equipment life
- Effectively cushions drive train shock and reduces noise
- Smoother shifting
- Leaves protective film on all internal parts even after shut down providing instant lubrication on cold start-up (where 60-80% of engine wear occurs)
- Reduced oil and fluid foaming
- Blends with all petroleum-based engine/gear oils and synthetic oils.
